

Occlucard 3D USER MANUAL

1. This manual serves as a manual for the use of the Occlucard 3D teeth training model (hereinafter referred to as the "Model").
2. This Model is not a toy and is only intended for use by persons over 18 years of age.
3. This Model is not intended for training in the modelling of dental fillings modelling tools, it serves only as a template.
4. Store this Model at a temperature of 15-25°C, in a dark and dry place. Do not expose Model to direct sunlight or temperatures higher than 45°C. When exposed to direct sunlight Model may change its colour or its' structure may be damaged.
5. To clean the Model use clean water without using detergents. Just clean the model in water, do not leave it submerged in water for more than 15 minutes.
6. The model is made of acrylic resin, which may cause allergic reactions in some people. If you have had symptoms of an allergic reaction to acrylic resins in the past or if you want to reduce the risk of its occurrence, we recommend wearing protective nitrile gloves when working with and handling the Model.
